

If patients answer “yes” to any of the questions, guidance is included on what actions to take. Here are some of the screening questions included in the script:

- Have you or anyone in your household had any of the following symptoms in the last 21 days: sore throat, cough, chills, body aches for unknown reasons, shortness of breath for unknown reasons, loss of smell, loss of taste, fever at or greater than 100 degrees Fahrenheit?
- Have you or anyone in your household been tested for COVID-19?
- Have you or anyone in your household visited or received treatment in a hospital, nursing home, long-term care, or other health care facility in the past 30 days?
- Have you or anyone in your household traveled in the U.S. in the past 21 days?
- Have you or anyone in your household traveled on a cruise ship in the last 21 days?
- Are you or anyone in your household a health care provider or emergency responder?
- Have you or anyone in your household cared for an individual who is in quarantine or is a presumptive positive or has tested positive for COVID-19?
- Do you have any reason to believe you or anyone in your household has been exposed to or acquired COVID-19?
- To the best of your knowledge have you been in close proximity to any individual who tested positive for COVID-19?

If patient answers “yes” to any question, their responses should be reviewed by a designated medical leader to assess whether the patient can keep the scheduled appointment. Patients will be contacted again after decision-making.

**Patients should be told their responses will be kept confidential and will be reviewed by a practice clinician who will provide guidance regarding any adjustments to the patient’s scheduled appointment.*
